HPM

HPM 12V a.c. 150VA Self Reset Thermostat  
Transformer Black

REF. RGL11

---

5 Year Warranty

> [Visit product online](#)

## Features

- 12 Volt Transformer
- Fitted with a self resetting thermal overload protection
- IP56 rating

## User Recommendations

- To select the right transformer, simply add up the total wattage of your garden lights and choose the next highest rating. For example, 10W + 20W + 10W + 10W = 50W.
- Tip: Buying a larger transformer than you require will give you more flexibility to add more lights in the future
- The total wattage of garden lights connected to this transformer must not exceed the wattage of the transformer

## Overview

The HPM 12V a.c. 150VA Transformer for Garden Lighting with Self Reset Thermostat is essential for reducing 240V mains voltage to the 12V required by HPM D.I.Y. garden lights. This transformer features 'Self Resetting Thermal Overload Protection' to ensure safe operation by shutting down the system if necessary.
